Areas of Specialization:

I am passionate about finding ways to modulate the microbiome to shift its functional potential through a combination of wet lab and bioinformatics analysis. My work has focused on innate mucosal immunology and elucidating ramifications and complexities of host-microbe interactions.

Education:

University of California Davis, Davis CA

PhD, Animal Biology with a designated emphasis in Host-Microbe Interactions

anticipated spring 2020

MS, Animal Biology

December 2015

BS, Cell Biology

December 2011

Additional Training:

Leadership Challenge Workshop: Leadership Practices Inventory

02/19

University of California, Davis Graduate School of Management

Strategies and Techniques for Analyzing Microbial Population Structures (STAMPS)

08/18

Marine Biological Laboratory, Woods Hole MA

Relevant Experience:

PhD Dissertation UC Davis (PI: Elizabeth Maga, PhD)

9/15 – Present

Dissertation Topic: Surveying the composition and function of the fecal microbiota of dairy cows across California.

- Created a pipeline for 16S amplicon analysis projects:
 - Identifying farm variation in microbial communities of feces and milk from dairy cattle.
 - Proficient in diversity, differential abundance and variability analysis
 - Evaluating differences in microbial populations due to sampling method from the rumen of cattle.
- Analyzing metagenomic data to determine functional differences of the microbiome of cattle and identification of taxonomy contributing to nitrogen cycling and antibiotic resistance.
 - Wrote custom scripts using snakemake, python, bash and R for data manipulation and analysis
- Scripts and description of projects can be found at <https://github.com/jvhagey>
- Engineering *Lactococcus lactis* to secrete SodA for therapeutic use against *Salmonella* and *E. coli* in dairy calves.

Masters Thesis UC Davis (PI: Elizabeth Maga, PhD)

8/13 – 12/15

Thesis Topic: Modulation of Gut Microbes: Interplay between Peptidoglycan Recognition Proteins and Lysozyme.

- Solid foundation in study design and statistical analysis with SAS, R, Adobe Illustrator and GraphPad Prism.
- Used an intestinal cell line, IPEC-J2, to determine expression of peptidoglycan recognition protein-3/4 in response to milk products, commensal and pathogenic bacteria.
- Analyzed gene expression of cytokines and immune receptors via qRT-PCR in a malnourished swine model.

Lab Manager (PI: Munashe Chigerwe, BVSc, MPH, PhD)

1/13 – 9/14

University of California Davis, Department of Medicine and Epidemiology

- Effectively managed administrative all aspects of research projects including budget management, maintained adherence to Standard Operation Procedures and university regulations, hiring, training and data acquisition.
- Achieved completion of multiple concurrent research projects in a timely manner while adhering to a budget.
- Accurately processed and measured immunoglobulins in colostrum and serum via ELISAs and RIDs.
- Designed and optimized new immunoassay protocol for measuring immunoglobulins in feces.
- Independently held interviews and oversaw the training and mentoring of 5 research assistants.

Fellowships & Awards:

- Winner of poster competition at the Congress of Gastrointestinal Function 2019
- Leland Roy Saxon and Georgia Wood Saxon Fellowship 2013-2014, 2017-2020
- Sacramento Rainbow Chamber of Commerce Fellowship 2016
- Provost's Prize and People's Choice for Best Student Organized Session, Interdisciplinary Graduate and Professional Student Symposium 2016
- Hart/Cole/Goss Research Fellowship 2015 & 2016
- Graduate Program Fellowship for outstanding academic record 2013-2018

Grants Received:

- Grad Student Association's Travel Award 2018
- Center for Food Animal Health, Animal Health | \$20,000 2017-2018
- Henry A. Jastro Shields Research Grant 2015
- Animal Biology Executive Committee Travel Award 2015
- Keystone Symposia Underrepresented Trainee Scholarship 2014

Poster Presentations:

Congress on Gastrointestinal Function

Identification of Microbes Involved in Nitrogen Fixation in Dairy Cow Manure on Farms across California 04/19

International Society of Microbial Ecology

Prevalence of Nitrogen Fixation Genes in Dairy Cattle Feces 08/18

Animal Biology Graduate Group Colloquium

Survey of Microbial Fecal Populations across California Dairies 10/16

Keystone Symposia: "Gut Microbiota Modulation of Host Physiology: The Search for Mechanism"

Lysozyme Transgenic Goat Milk Regulates Expression of Peptidoglycan Recognition Protein 3 & 4 04/15

Teaching and Mentoring:

- Trained over 15 research assistants several of whom have presented posters.
 - Teaching Assistant for over 6 years for Introduction to Biology and taught molecular biology laboratory sections for Animal Genetics 111 and Animal Nutrition 115.
- Completed six-week workshop series on “Student, Instructor, Classroom: Strategies for aligning teaching with learning” through UC Davis’ Center for Excellence in Teaching and Learning.
